## SUMMARY

Dynamic and motivated Third-year Electronics and Computer Science student with a strong foundation in programming languages including Python, C++, C, and Java. Currently pursuing a Bachelor of Engineering degree from Fr. Conceicao Rodrigues College of Engineering .

## SKILLS

- **Languages:** Python, Java, C, C++,Java Script
- **Database Management:** SQL
- **Soft Skills:** Problem solving, Management, Leadership, Innovation, Teamwork

## EDUCATION

**Fr. Conceicao Rodrigues College of Engineering**                                                             Mumbai, India
Bachelor of Engineering in Electronics and Computer Science **(CGPA: 6.9/10)**          **November 2022 – Present**

**Viva College**                                                                                                                            Virar, India

Higher Secondary School Certificate     **(72.3%)**                                                                **June 2021**

**Holy Spirit High School**                                                                                                        Virar, India

Secondary School Certificate             **(83.2%)**                                                        **March    2020**

## PROJECTS

**Hospital Management System**                                                                                              **Jun 2024**

- Developed a comprehensive hospital management system to streamline hospital operations and improve patient care. The system integrates various hospital departments, managing patient records, appointments, billing, and inventory efficiently.
- Tech Stack: Java, MySQL, HTML/CSS, JavaScript, Spring Boot.

## ACHIEVEMENTS

- Rank 3rd in Algoholic 2023 Fr. CRCE.
- Participated in Hackathon in 2023.
- Solved more than 250 question on Codeforces.
